India – Japan Chemicals & Petrochemicals Forum

India – Japan Trade Relation:

The friendship between India and Japan has a long history rooted in spiritual affinity and strong cultural and civilization ties. Japan is regarded as a key partner in India’s economic transformation. In the recent past, the India Japan relationship has transformed into a partnership of great substance and purpose. Japan’s interest in India is increasing due to a variety of reasons including India’s large and growing market and its resources, especially the human resources.

Japan’s bilateral trade with India, totaled USD 17.63 billion in FY 2018-19. Exports from Japan to India during this period were USD 12.77 billion and imports were USD 4.86 billion. The bilateral trade between India and Japan for FY 2019-20 (April – December) totaled USD 11.87 billion. India’s exports from Japan amounted to US\$ 3.94 billion while India’s import from Japan amounted to US\$ 7.93 billion. India’s primary exports to Japan have been petroleum products, chemicals, elements, etc. whereas India’s primary imports from Japan are machinery, electrical machinery, iron and steel products, plastic materials, organic chemicals, manufactures of metals, etc.

1500 - 1700 hrs	India – EU Chemicals & Petrochemicals Forum
India – EU Trade Relation:	
<p><i>The EU and India share common values and interests in each other's security, prosperity, and sustainable development. In 2019-20, the bilateral trade between the EU and India stood at USD 104.93 billion as against USD 115.6 billion in 2018-19. The EU is one of the few territories with which India has a marginal trade surplus. The trade balance between India and the EU has increased to USD 2.53 billion in 2019-20 from USD -1.26 billion in 2018-19.</i></p> <p><i>The chemicals strategy is part of the Green Deal whose primary goal is to bring about climate neutrality for Europe by 2050. The implementation of the chemicals strategy with over 50 measures will have far-reaching consequences for the chemical industry and the users of chemical products. India, being the world's second-largest emerging market, and the EU, playing a key role in this transformation can help the Indian industry to bring Green Chemistry within the country.</i></p>

1800 - 2000 hrs	India – US Chemicals & Petrochemicals Forum
<p>India – US Trade Relation: <i>Shared democratic values and growing convergence on bilateral, regional, and global issues have provided a strong base for India – US relations, which have now evolved into a strategic partnership of global significance. The relationship enjoys strong bipartisan and popular support in both countries. The U.S. is India’s largest trading partner, goods, and services combined. Bilateral trade in goods and services grew by more than 10% per annum over the past two years to reach USD 142 billion in 2018-19. India - U.S. trade in services stood at USD 54.5 billion. Of this, India’s services exports to the U.S. were valued at USD 28.7 billion and India’s imports of services from the US were valued at USD 25.8 billion.</i></p> <p><i>Both countries are collaborating and coordinating on a number of regional and global issues in both security as well as development spheres. The US continues to be one of the largest sources of FDI for India as U.S. direct investments in India are estimated at about USD 44.5 billion, whereas Indian FDI in the U.S. is estimated at USD 18 billion.</i></p> <p>Moderation by Mr. Anthony Scamuffa, Chemicals Leader & Partner Assurance, PwC US</p>
